

WHAT WE DO **SAGE-GREY** SHOWCASING **IMPACT** **FINANCING** **IN AFRICA**

Many businesses in Africa are becoming more mindful of the role of the sustainable development goals, and the impact their businesses have on the environment.

Our task was to produce a world-class documentary that speaks to Sage Grey's exploits in facilitating business models that uphold the standards of environmental impact. The documentary featured interviews with key stakeholders of the various companies under the Sage Grey investment profile, as well as a sneak peek into the next phase of the company's impact investing initiative.
